

IP Commerce Opens Worlds of Commerce

IP Commerce, Inc. is a software company that provides dramatically simplified development, certification, and deployment of secure commerce solutions. The company's IP Commerce Platform, Commerce Lab, and Commerce Marketplace unites software companies, service providers and distribution channels in a private-labeled end-to-end network delivering on-demand access to commerce services— far more quickly, easily and securely than ever before.

IP Commerce maintains partnerships with some of the world's most respected financial institutions and software companies. The company is backed by leading investors, including Venrock, Appian Ventures, and Meritage Funds.

IP Commerce Technology

IP Commerce offers a single-integration software platform and free development toolkits that allow for end-to-end commerce solution development and broader channel opportunities.

The company's IP Commerce Platform unites software companies and payment service providers – providing bankcard processing, remote deposit capture, ACH, gift, stored value and many other services – with distribution channels in a dynamic new environment, allowing each to deliver a wide range of payment-enabled software solutions to business far more quickly, easily and securely than ever before.

Commerce Platform Infrastructure

Payment integration, deployment, lifecycle management, and compliance is hard. But it doesn't have to be...

The IP Commerce Platform solves for these difficulties by allowing dynamic combinations of commerce solutions with payments service. Now you can collaborate with other members of the IP Commerce Network to bring your solutions or services to market more quickly than ever before.

The IP Commerce Platform is the core, cloud-based technology that powers an open commerce network.
